Dear Mr. Dalangin,

My name is Job Aarron Misenas, and I'm excited to apply for the position of Junior IT specialist at the Batangas State University – ARASOF. I'm a recent graduate (June 2025) in Bachelor of Science in Information Technology from Batangas State University – ARASOF, and I'm eager to enter the workforce. I meet all of the academic requirements mentioned in your job posting.

Growing up, I took a liking to all things tech and digital, which led to me picking IT as my major. Apart from all the tech courses during my IT studies, I thoroughly enjoyed in my psychology courses. I'm especially interested in the intersection of tech and humanity in terms of how they will respond and adapt as times goes by.

During my final years in university, I interned at OrangeApp Inc, in which I was a Junior Web Developer and at the same time side-work at the network troubleshooting if there is small issue to other devices.

What excites me most about this position is to expand my knowledge at the same time is apply my skills after my years in the university.

I look forward to use and expand my knowledge and skills to use as a productive member of your IT department and learning from the best in the industry. In an interview phase, I would love to discuss my short and long-term career goals and how they align with the IT Department of Batangas State University – ARASOF. I await your call.

Sincerely,

**JOB AARRON MISENAS**
